

WWF-UK Forest & Trade Network - an example of a responsible forest products purchasing policy

This organisation is committed to the responsible purchasing of forests and our long-term intention is to source all forest products that we purchase or specify from well-managed forests which have been certified to credible certification standards.

This commitment will be realised through a stepwise approach to responsible purchasing which utilises the best available techniques and information.

This organisation will not source forest products from:

- Forests or forest product suppliers that do not comply with all relevant national and international legislation relating to the trade in forest products.
- High Conservation Value Forests where these are recognised nationally or regionally, unless these forests are progressing towards credible forest certification in a time-bound, stepwise and transparent manner.
- Protected areas, Parks or similar areas where harvesting operations are not complimentary to responsible forest management.
- Forests which are currently being converted to other land uses, or forests that have been converted since 1994.
- Forests which are in areas of armed conflict or civil unrest where there is a direct relationship between the forest products trade and the funding of such conflicts.

To ensure that these goals are achieved this organisation will:

- Scrutinise all suppliers of forest products for all purchases of goods for resale, not-for resale and in all new construction activities.
- Seek information as to the source of all forest products
- Evaluate this information against our stated policy
- Continuously improve the level of compliance against these policies, with annual reviews, reports and actions agreed with our suppliers
- Work with and encourage suppliers and forest sources who are actively engaged in a process of time-bound, transparent, stepwise commitment to credible certification (such as WWF Producer Group members)
- Work with key stakeholders to ensure that best practice is followed.
- Set annual, publicly communicated targets regarding our performance.

This organisation will abide by all local, state and national laws and international conventions (including but not limited to Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), World Heritage Convention (WHC), and the Convention on Biological Diversity (CBD) as well as moratoria on logging, declarations of protected areas, forestry laws, environmental protection legislation, as well as labour and social laws.

This organisation will never knowingly become involved in, collude with or purchase timber from illegal logging operations. We will work with our supply chain to ensure that all forest products originate from forests where there is full legal and verifiable title to the land, and the harvester has all relevant and
