

# RECYCLED POLAR BEAR LANTERN

## What you need

- Milk bottle
- Tissue paper
- Pens
- PVA glue
- Scissors

## What to do

1. Rinse out and cut off the bottom of a milk carton.
2. Tear some tissue paper into small pieces and stick it to your milk carton using PVA glue. Research images of the Arctic sky and northern lights for inspiration.
3. Print off this picture of a polar bear and stick it in its snowy habitat. Make sure the polar bear has everything it needs to survive; sea ice to hunt, seals and fish to eat and a den for its cubs.
4. Why not research which other animals live in the arctic and draw them on your lantern?
5. Decorate with stars and patterns.
6. Place an LED light in the lantern and light it on Earth Hour to celebrate our amazing planet.

DECORATE  
WITH  
STARS AND  
PATTERNS
