What you need

- Milk bottle
- Tissue paper
- Pens
- PVA glue
- Scissors

What to do

1. Rinse out and cut off the bottom of a milk carton.
2. Tear some tissue paper into small pieces and stick it to your milk carton using PVA glue. Research images of the Arctic sky and northern lights for inspiration.
3. Print off this picture of a polar bear and stick it in its snowy habitat. Make sure the polar bear has everything it needs to survive; sea ice to hunt, seals and fish to eat and a den for its cubs.
4. Why not research which other animals live in the arctic and draw them on your lantern?
5. Decorate with stars and patterns.
6. Place an LED light in the lantern and light it on Earth Hour to celebrate our amazing planet.

CARDBOARD ROLL PENGUIN

Instructions
1. Trim enough black felt to fit around the cardboard tube. Use the glue stick to attach it to the cardboard roll. Make sure the ‘join’ faces the back and use the front for your penguin face and body.

2. Cut out one large ‘U’ shape from the white felt to use as the belly for your penguin. Stick this on using the glue (use the image on the activity sheet to guide you on scale and position).

3. Using both the black and white felt together, cut out a leaf shape so you end up with one side black and one side white. Stick these together using the glue to create the two flippers for your penguin. Glue on either side of the body.

5. Using the orange felt cut out two orange feet and one bill and use the glue to attach the feet and then the bill.

6. Using the black and white felt, cut out two white small circles and two smaller black circles. Now stick these on to create two eyes for your penguin.

7. Finally, use the black felt to cut out an oblong shape and cut along one edge to create a fringed effect. Then glue it around the rim (of the top) of your penguin’s head to create feathers. Your penguin creation is now complete!

What you need
• One kitchen roll cardboard tube (cut in half)
• Three sheets of eco-friendly felt (black, white and orange)
• Scissors
• Eco-friendly glue stick

© SeventyFour
* Adult help may be required using scissors/cutting out shapes

SHOW THE LOVE – GREEN HEART ANIMALS

This February, people across the country will show the love for all the things that are affected by climate change. Join The Climate Coalition and turn hearts green for Valentine’s Day. Create your own unique green heart and wear or share to show you care about climate change.

What you need
• Green felt, paper or card
• Scissors
• Fabric glue
• Buttons, sequins and anything else you have in your craft box!

What to do

Panda
1. Cut out three large green hearts.
2. Cut a little heart for the nose.
3. Glue these to your first large green heart and add a smile and eyes.
4. Decorate

Lion
1. Cut into the edges of the second large green heart or add wool or string to create a lion’s mane.
2. Cut a smaller heart and glue it, upside down onto the centre of the larger heart.
3. Add a heart nose then eyes.
4. Add a powerful message to show you care about climate change.

Fox
1. Cut out two sets of hearts, one set for the eye markings and one set makes the ears.
2. Repeat but with the hearts slightly smaller.
3. Add eyes and a heart shaped nose.
4. Personalise!
