

WWF MANIFESTO FOR YOUR WORLD

WWF are calling on all parties to respond to the crisis facing #OurPlanet, and #FightForYourWorld by making the UK the first major economy to:

1. PUT NATURE ON THE PATH TO RECOVERY

Bring forward world-leading legislation that includes legally binding targets to restore nature on land and at sea and reduce our environmental footprint abroad.

Transform our agricultural system by pioneering a world-leading system that pays farmers to protect nature.

2. DRIVE GLOBAL AMBITION TO RESPOND TO THE PLANETARY EMERGENCY

Declare a planetary emergency at UNGA 2020.

Ensure global targets on biodiversity reverse nature loss by 2030

Support global finance mechanisms for nature restoration through the Global Resources Initiative.

3. END OUR CONTRIBUTION TO CLIMATE CHANGE

Unlock the most cost-effective form of renewables: on-shore wind.

Make energy efficiency a policy priority by retrofitting 20 million homes and commit all new homes to be Zero Carbon.

Bring forward the ban on new petrol or diesel cars to 2030.

4. PIONEER AN ECONOMIC AND FINANCIAL SYSTEM THAT WORKS FOR PEOPLE & PLANET

Commit 5% of government spending on climate and nature.

Appoint a new Minister for Sustainability.

End fossil fuel subsidies and redirect the finance towards a fair transition to net zero.

5. STOP DEFORESTATION IN OUR FOOD

End the importing of deforestation in our food and set a timeline to achieve this.

Require businesses to have transparent, sustainable supply chains.

Ensure all future trade deals have the highest environmental standards.

We are the first generation to know we are destroying our planet and the last that can do anything about it. We owe it to those who will inherit our planet to ensure the actions we take account for their impact on **future generations**.
