

MAKE YOUR OWN SCOTTISH NATURE THEMED LANTERN

Scotland is home to a diverse range of wildlife. Many species can be found in its forests, oceans and skies, such as the red squirrel, the basking shark and the white-tailed eagle. As human activity harms their environment and changes the climate, these animals need our support more than ever.

TIP!

For the tissue paper, you can use similar colour palettes to these ones for a real Scottish nature visual!

1 Collect empty milk cartons or glass jars

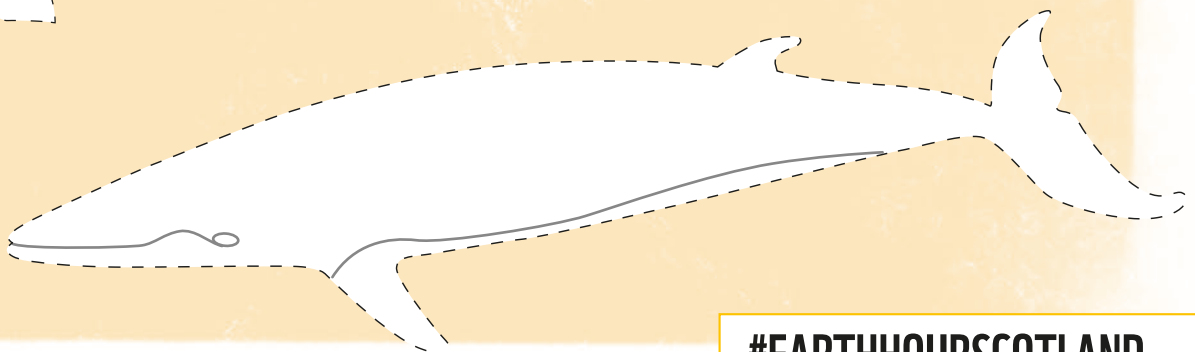

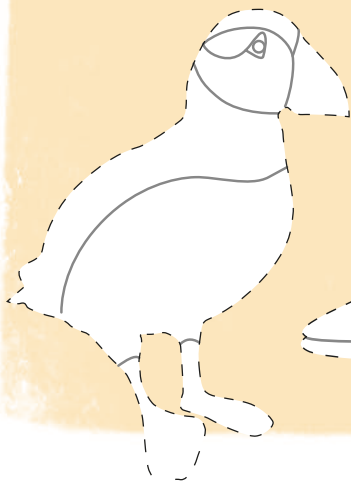

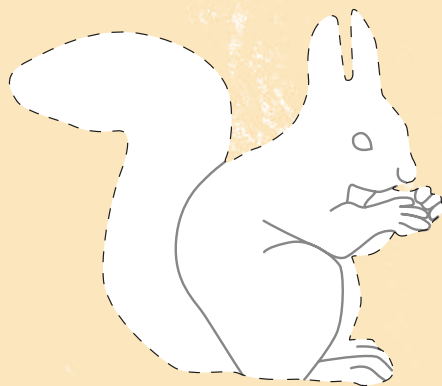

2 Rinse them, and cut the milk carton's upper part off

3 Tear some colourful tissue paper, and cut the Scottish wild animals off this sheet

4 Glue your tissue paper pieces and animals on the reused carton or jar, and light it up with LEDs!
