

## GAMES

*Here're some fun animal themed games, perfect to play when you're with friends and family on a video call.*

### ANIMAL CHARADES

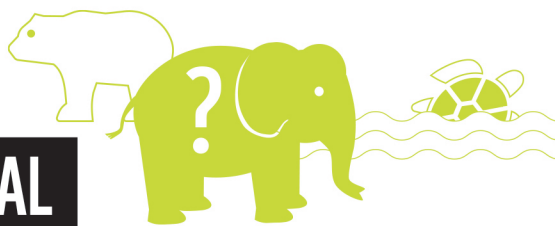

A player thinks of an animal and silently acts it out to the other players, who guess what the animal is. When the animal is guessed correctly, someone else then becomes the silent actor. Take it in turns until everyone has had a turn at being the actor.

### ANIMAL MUSICAL STATUES

Play your favourite songs and dance away – you could even make the songs animal themed. One adult, who is in charge of the music, will randomly stop the music. Everyone then needs to be as still as possible until the music restarts. Any wobbles and you're out! The winner is the last person remaining in the game.

### GUESS YOUR ANIMAL

One player writes down an animal on a piece of paper and places it facedown in front of them. Everyone else now takes it in turn to ask that player questions which can only be answered with a 'yes' or 'no'. The aim of the game is to be the first person to work out what animal has been written down. When a player thinks they know the answer, they shout it out. If they're correct, they then write down the new animal and the game continues. If they're wrong, everyone keeps asking questions and guessing until they find out what the animal is.

## HAVE FUN!
