## Letter to a Leader

### about Climate Change

TOGETHER  
FOR OUR  
PLANET

Dear \_\_\_\_\_

I am writing to you because I would like you to take action to slow down climate change. Climate change is affecting the whole world and every person can help to do something about it.

I wish to inform you that the planet is warming up because of things people are doing. Humans are burning fossil fuels (coal, gas and oil), cutting down forests and polluting the planet.

Did you know that climate change is causing lots of problems all over the world? The Earth is getting warmer, oceans are rising, ice is melting and the weather is changing. Climate change affects people all over the world but the people who do the least to cause it are often suffering the most.

Even though nobody can solve these problems on their own, there are things that every person can do to try to help slow down climate change.

I hope that you can help people to make changes to the way we all live in order to slow down climate change. Please think about ways we can all look after wild animals and their habitats (the places they live), save forests and other green spaces, use cleaner fuels and create less waste and pollution.

I would like to know what actions you and other leaders will take to help to slow climate change.

I look forward to hearing from you.

Yours sincerely,

---
