Letter to a Leader about Climate Change

TOGETHER
FOR OUR
PLANET

Dear _____,

I am writing to urge you to take action to limit climate change. The issue of climate change is affecting the entire planet and we need to work together to find solutions to the problem.

I wish to inform you that human activity has already caused our planet to warm by around 1°C. Humans are burning fossil fuels (coal, gas and oil), chopping down trees and polluting our planet.

I would like to express my concerns about these changes to our planet. Are you aware that climate change is causing lots of problems all over the world? The Earth is getting warmer, sea levels are rising, ice sheets are melting and extreme weather events are becoming more common. Climate change affects people all over the world but it is often those who do the least to cause it that are suffering the most.

Even though these problems cannot be solved by individuals, there are things that every person can do to try to help slow down climate change. Those that have contributed most to climate change should lead the way in finding solutions.

I hope that you can consider making decisions and changes that will help to slow down climate change. I ask you to consider ways that we can all look after species and their habitats, save forests and other green spaces, use more renewable energy and create less waste and pollution.

I would like to know what actions you and other leaders will take to help to slow climate change.

I look forward to hearing from you.

Yours sincerely,
