

School Promise to the Planet

For each area of school life, think about what you can **restore**, **replace** or **recycle**, and how you can **rethink** your approach.

Culture

Policies, encouraging sustainable choices in school and at home through school displays, events and communications.

| | | |
|-----------------------------------|----------------------------------|--------------------------------|
| The change we want to see: | | |
| Why is this important? | Who do we need to engage? | How will we reach them? |

Curriculum

Ensuring students learn about climate, sustainability and nature through lessons.

| | | |
|-----------------------------------|----------------------------------|--------------------------------|
| The change we want to see: | | |
| Why is this important? | Who do we need to engage? | How will we reach them? |

Campus

Making the school buildings and grounds as planet-friendly as possible.

| | | |
|-----------------------------------|----------------------------------|--------------------------------|
| The change we want to see: | | |
| Why is this important? | Who do we need to engage? | How will we reach them? |

Community

Creating ripples of change beyond the school gates.

| | | |
|-----------------------------------|----------------------------------|--------------------------------|
| The change we want to see: | | |
| Why is this important? | Who do we need to engage? | How will we reach them? |

Careers

Preparing students for the future of work with sustainable skills and knowledge of new green jobs.

| | | |
|-----------------------------------|----------------------------------|--------------------------------|
