YCA Climate & Nature Manifesto for Wales

The Youth Climate Ambassadors for Wales have developed a six-point manifesto for the Welsh Government detailing how they would like to see Wales tackling the global climate and nature crises.

Hundreds of young people from across Wales attended the Wales Climate and Nature Youth Summit in July 2021, supported by Keep Wales Tidy, Size of Wales and WWF Cymru.

The discussions and workshops resulted in a manifesto for the climate and nature action young people would like to see from the Senedd and the Welsh public to build a sustainable future for Wales and for future generations.

Six-Point Manifesto:

1. Increase labelling where possible so people are aware of our overseas footprints
2. Welsh Government to prioritise the restoration of peatlands across Wales
3. Welsh Government to produce a plan to ensure Wales is not contributing to deforestation overseas and is supporting reforestation of crucial overseas habitats
4. Make it compulsory for schools to recycle in Wales
5. All newly built houses, both privately and publicly funded, in Wales to be installed with renewable energy starting from 2023, e.g. solar panels or ground source heat pump
6. Welsh Government to fight for 'climate refugee' to be considered a legitimate status and influence the UK Government to commit to taking in a set amount of climate refugees per year
