

THE SUSTAINABLE FARMING SCHEME SIMPLIFIED

The Sustainable Farming Scheme is how public money will be used to support agriculture in Wales.

It aims to reward farmers for actions taken to respond to the climate & nature emergencies, alongside the sustainable production of food. Welsh Government will distribute the money to farmers through staggered tiers starting in 2025.

UNIVERSAL TIER

Entry level payment designed to be accessible to all farms

OPTIONAL TIER

More complex actions that go further for nature and climate

COLLABORATIVE TIER

More money for farmers working together across landscapes, and to develop opportunities from farm to fork such as local cooperatives
